

How to install Cisco Anyconnect app on Apple iPad

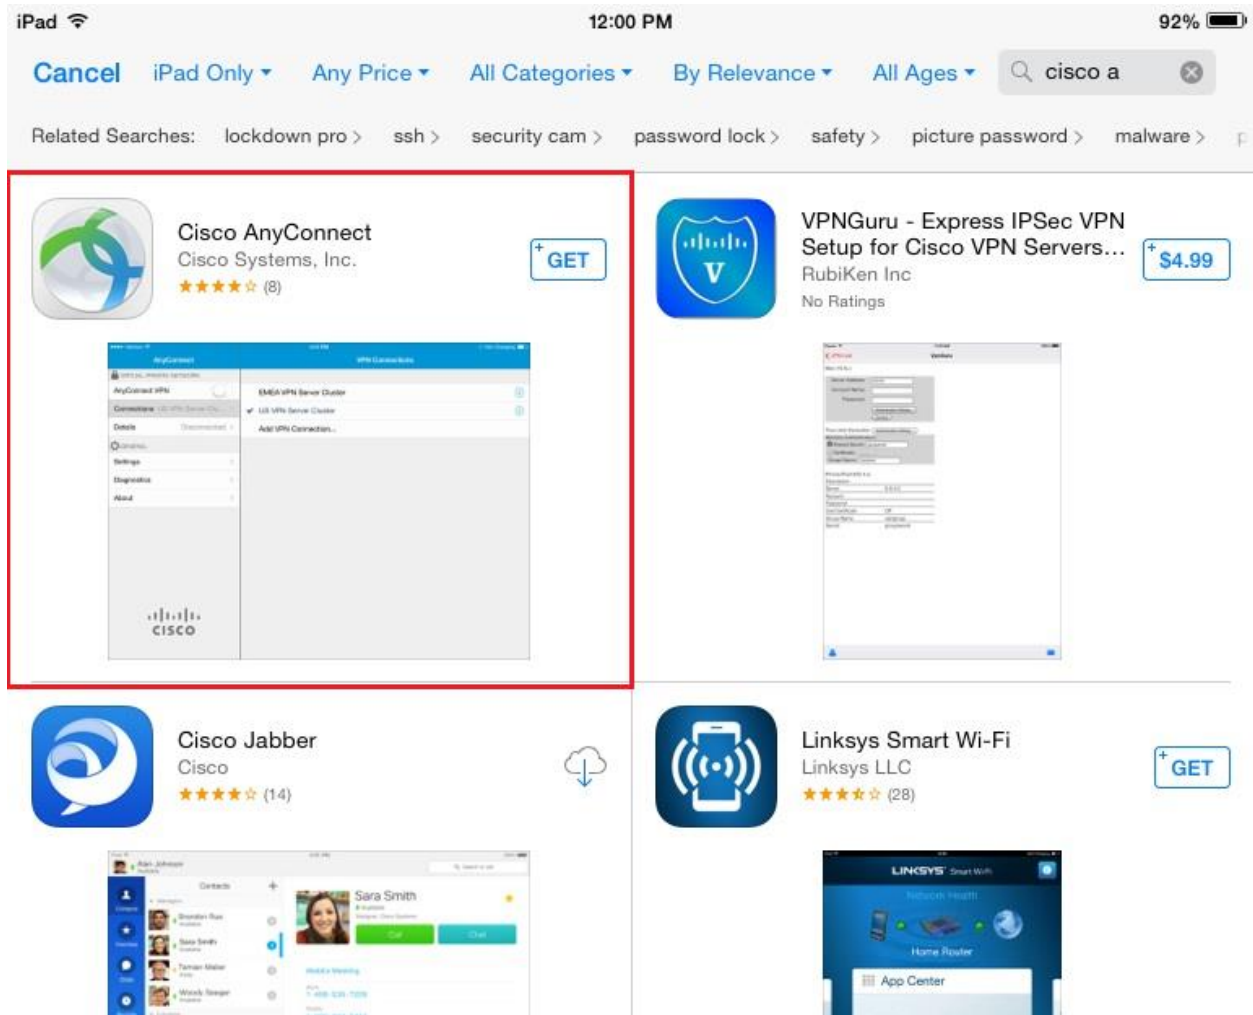

Step 1: Open App Store

Step 2: On the Search box, type “Cisco AnyConnect” and select from the result (shown in boxes)

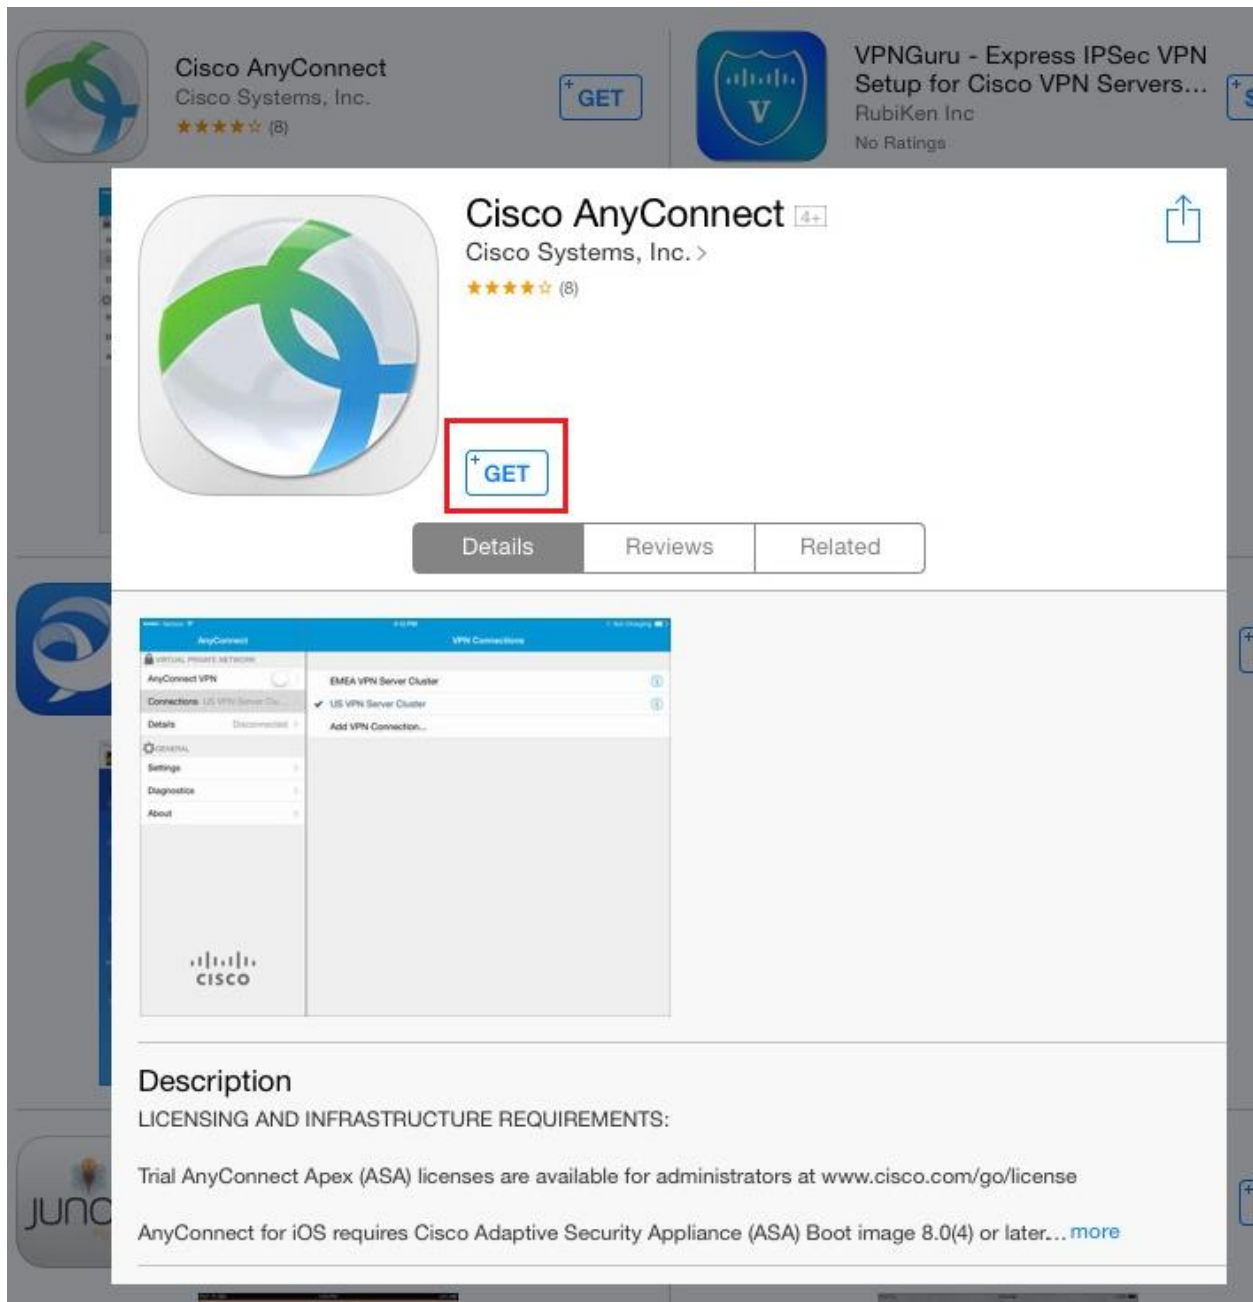

Step 3: Select “Cisco AnyConnect” from the results page (boxed in RED)

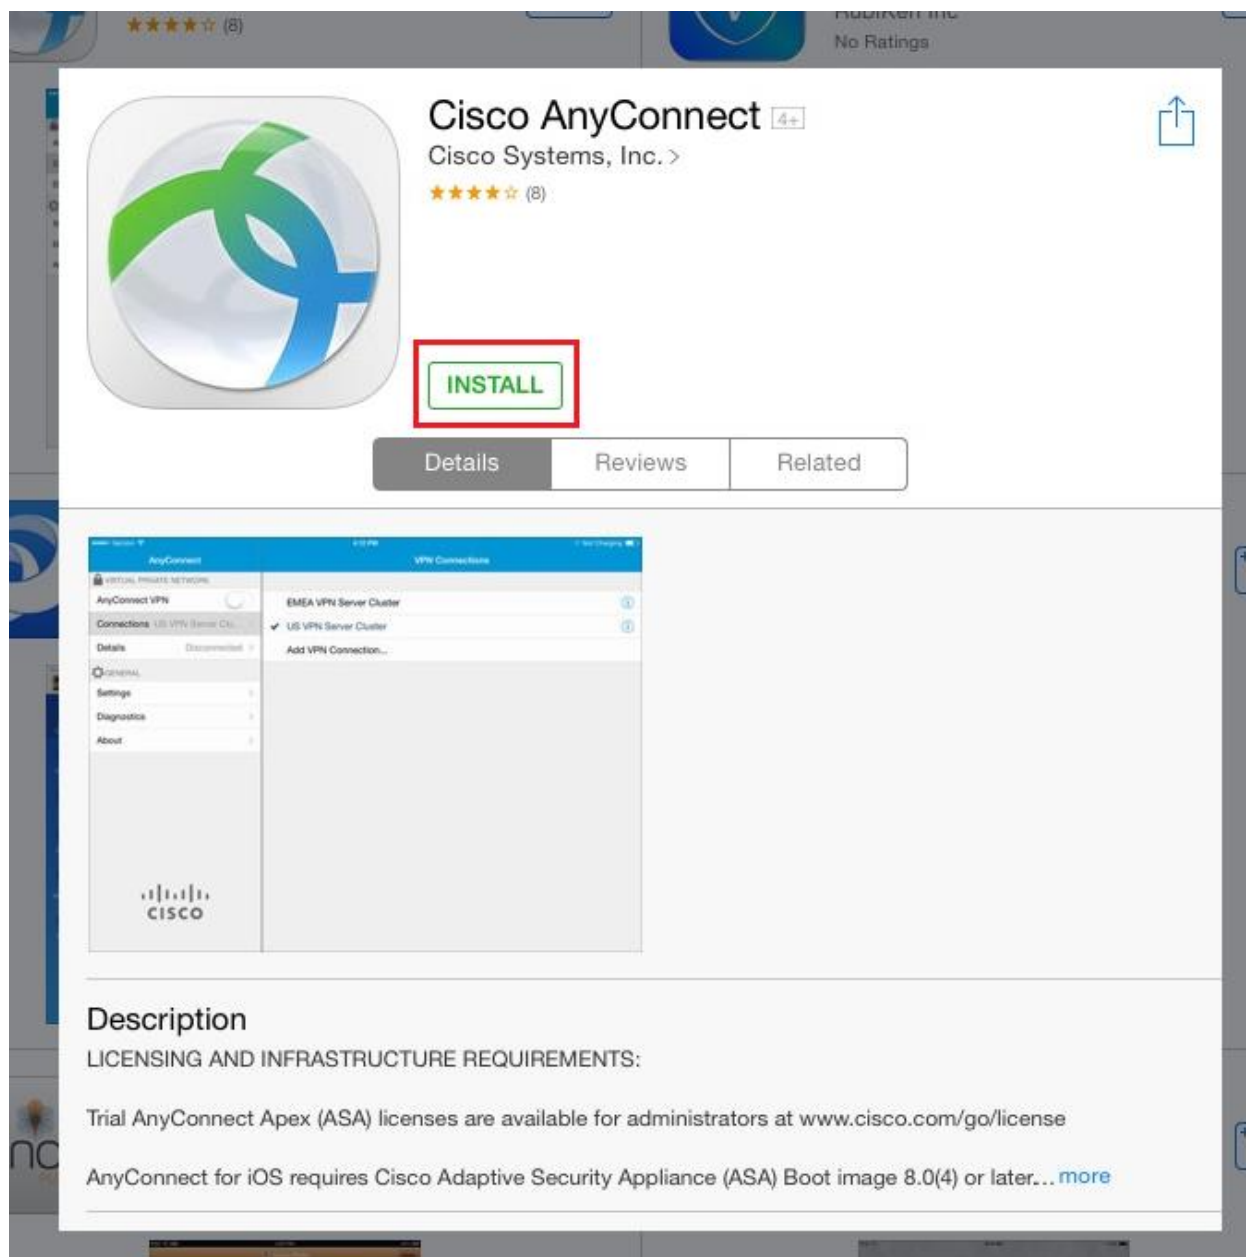

Step 4: Click “Get” to get started with app installation

NOTE: You might be prompted for iTunes password to download the app.

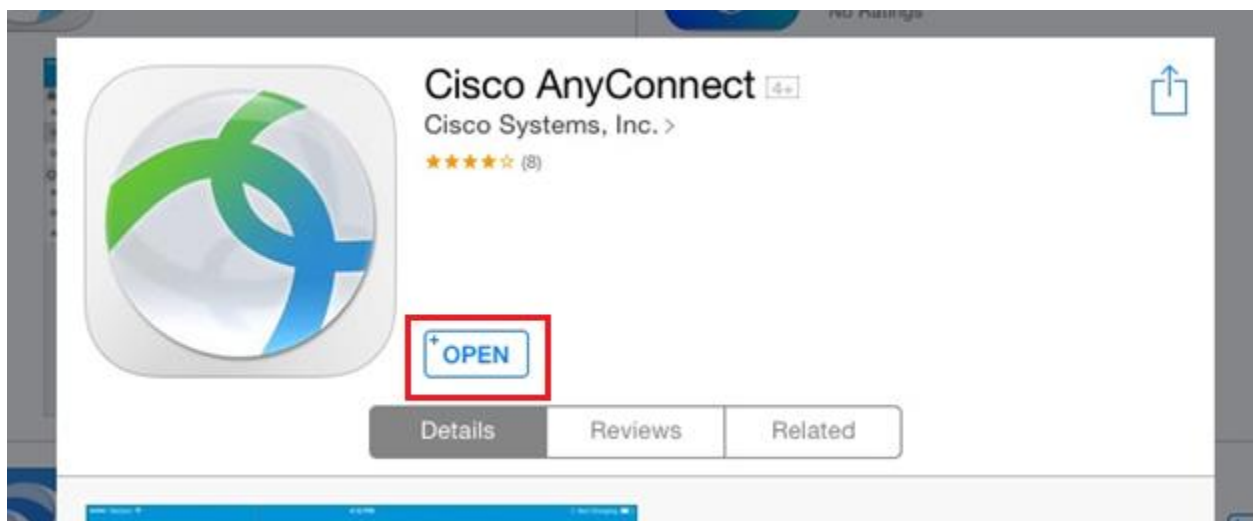

Step 5: Click “Install” to begin installation

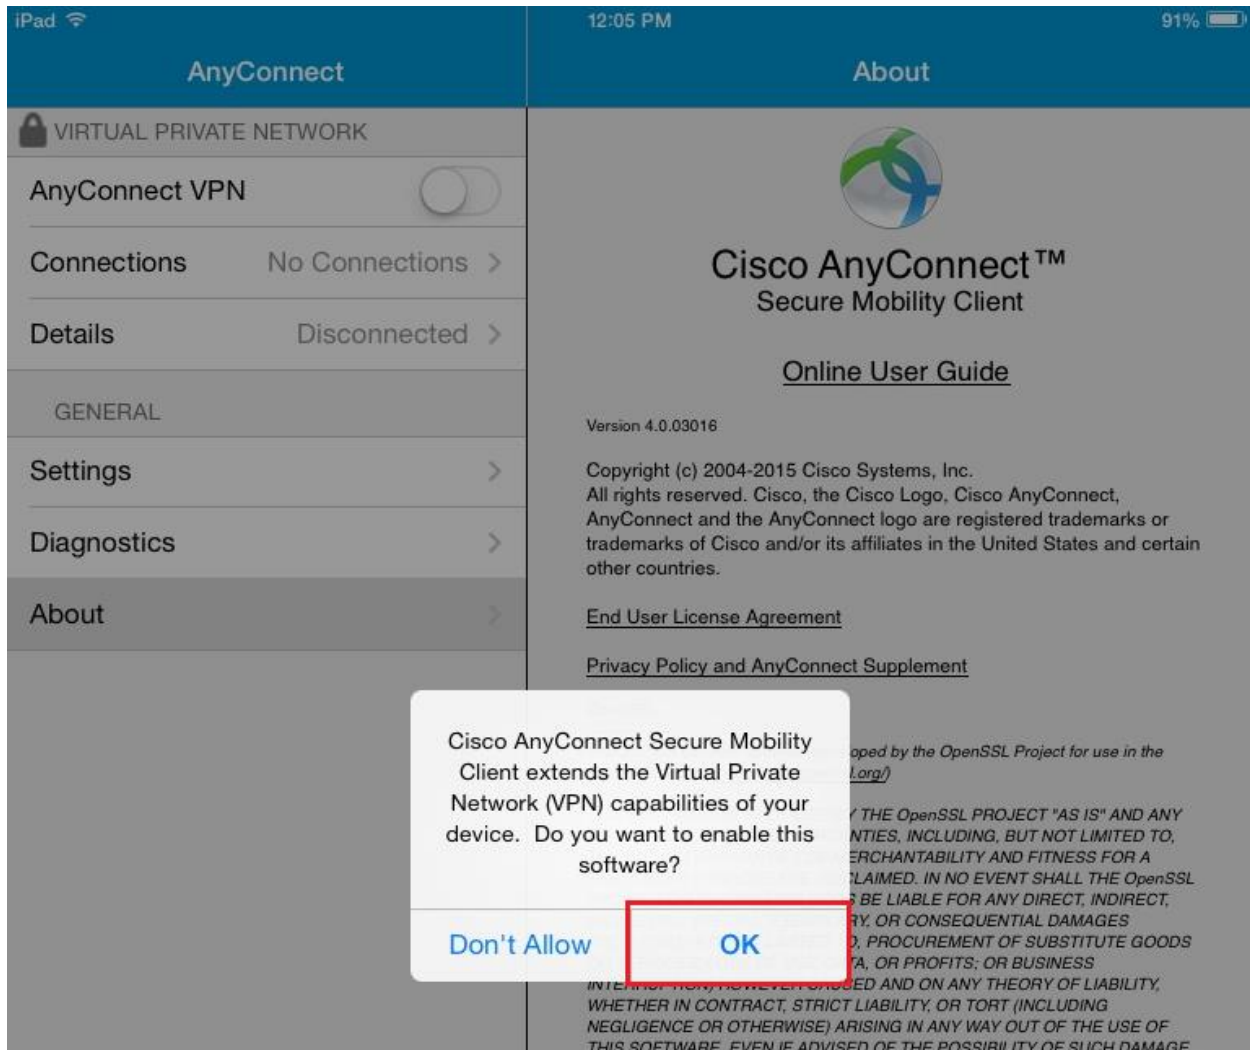

Step 6: App download progress begins

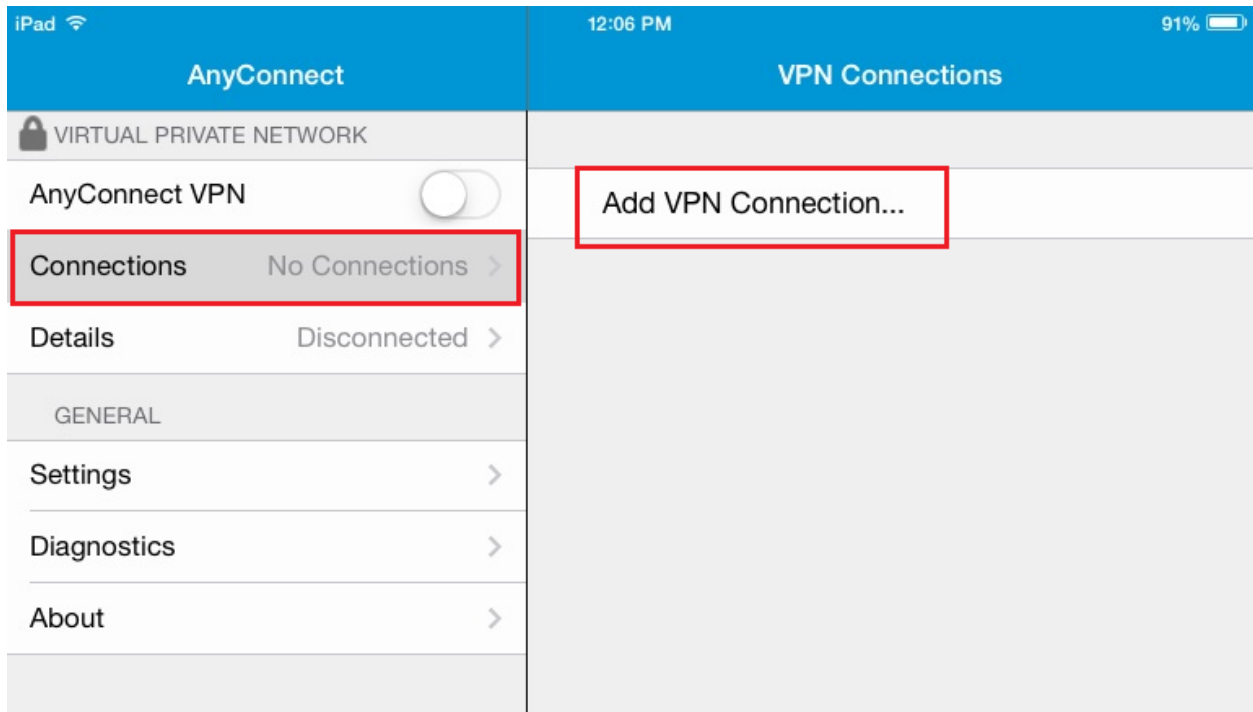

Step 7: After download is complete, click on "Open" to open the app

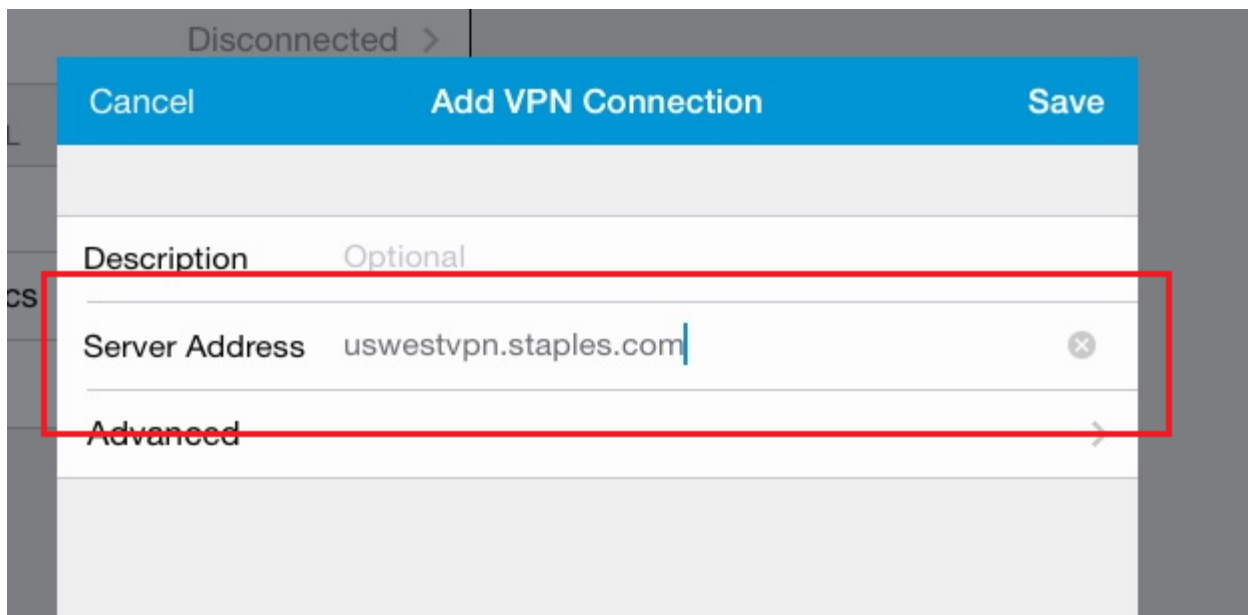

Step 8: Click “OK” to accept to enable the software

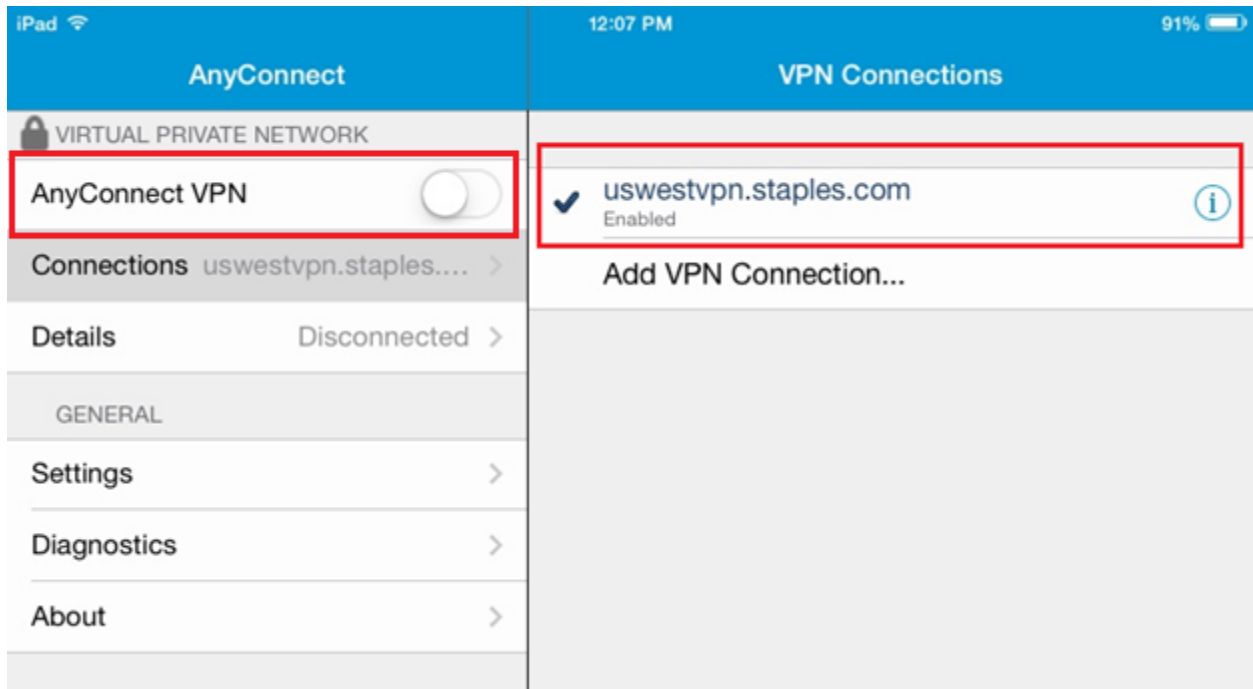

Step 9: Select “Connections” on the left and then select “Add VPN Connection”

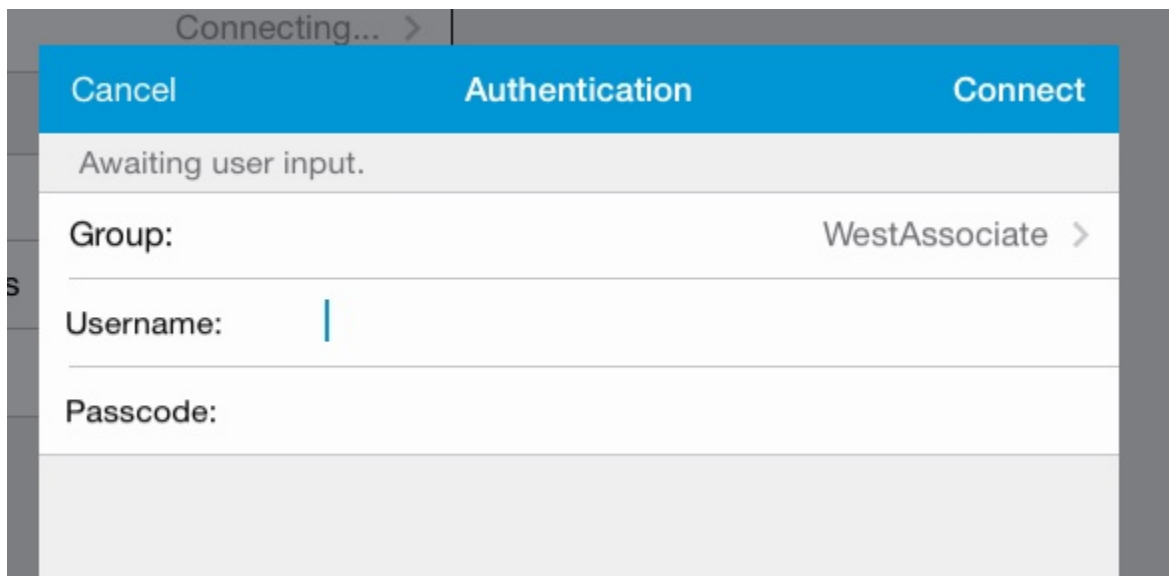

Step 10: In the Server Address section, type “uswestvpn.staples.com”

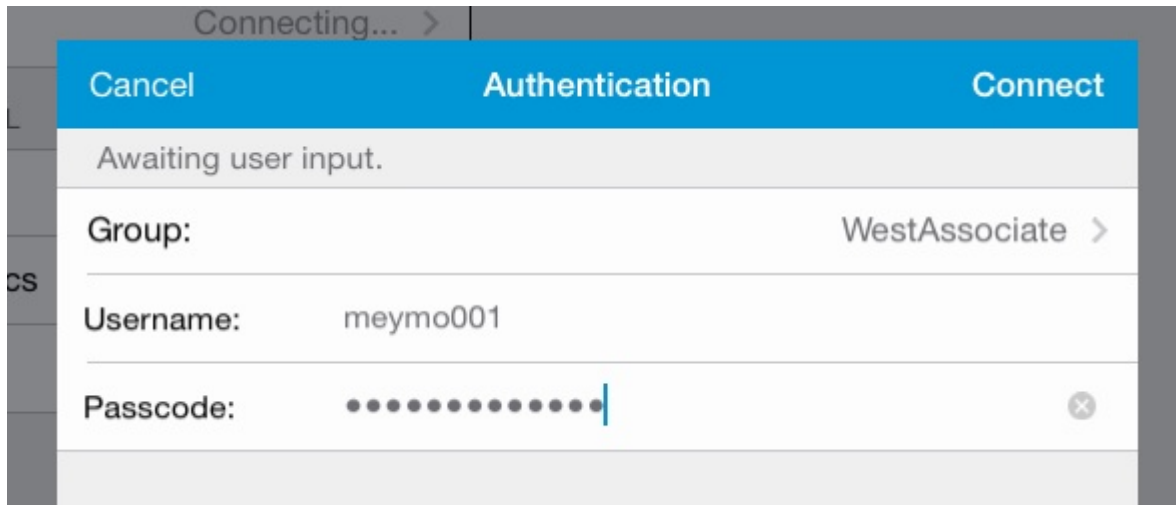

Step 11: Note VPN connection added on the right. Now enable “AnyConnect VPN” on the left

Step 12: Enter your Staples LAN ID and LAN Password to be connected to the Staples network

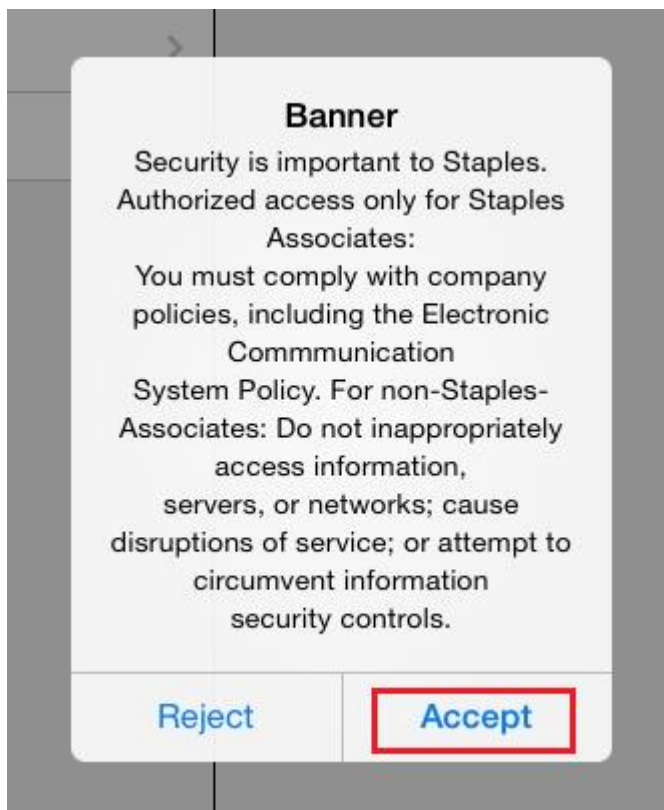

Example:

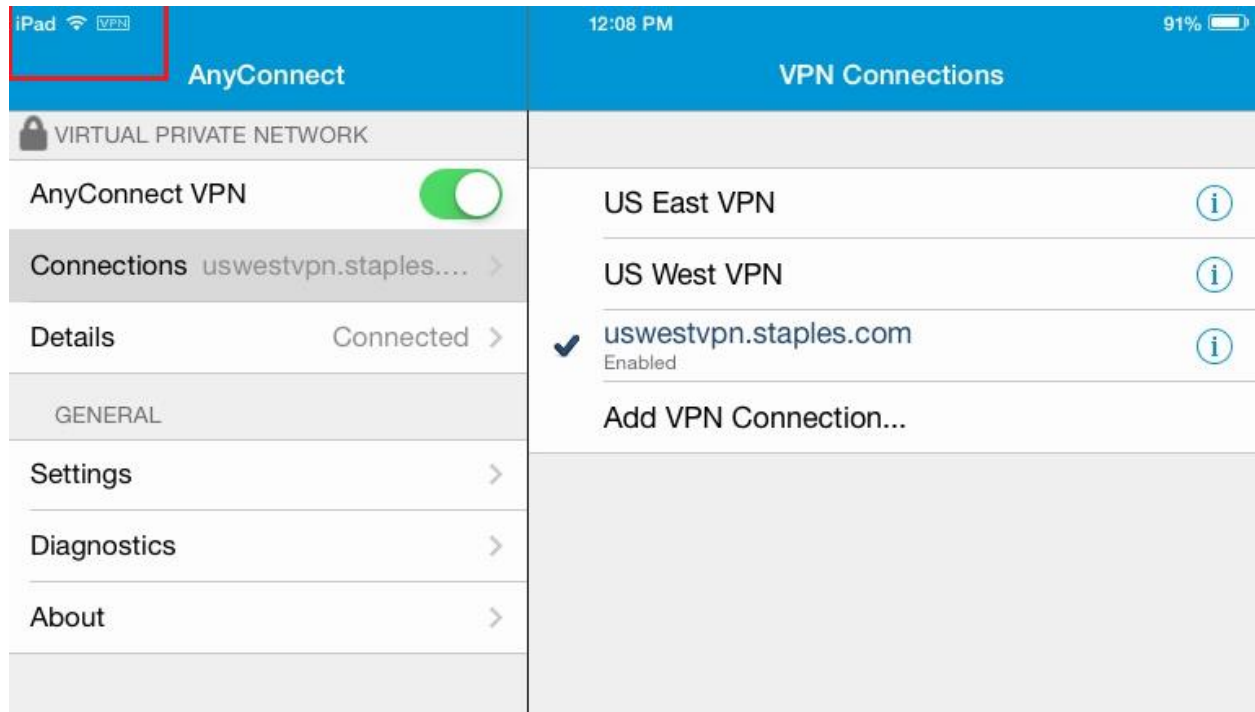

The screenshot shows an iOS-style authentication dialog box. At the top, there is a blue header bar with three buttons: "Cancel", "Authentication", and "Connect". Below the header, the text "Awaiting user input." is displayed. The dialog contains three input fields: "Group:" with the value "WestAssociate" and a right-pointing arrow; "Username:" with the value "meymo001"; and "Passcode:" with a series of dots and a blue cursor, and a close button (X) on the right. The dialog is set against a background that shows a "Connecting..." status at the top.

Step 13: Select "Accept" to be connected to VPN

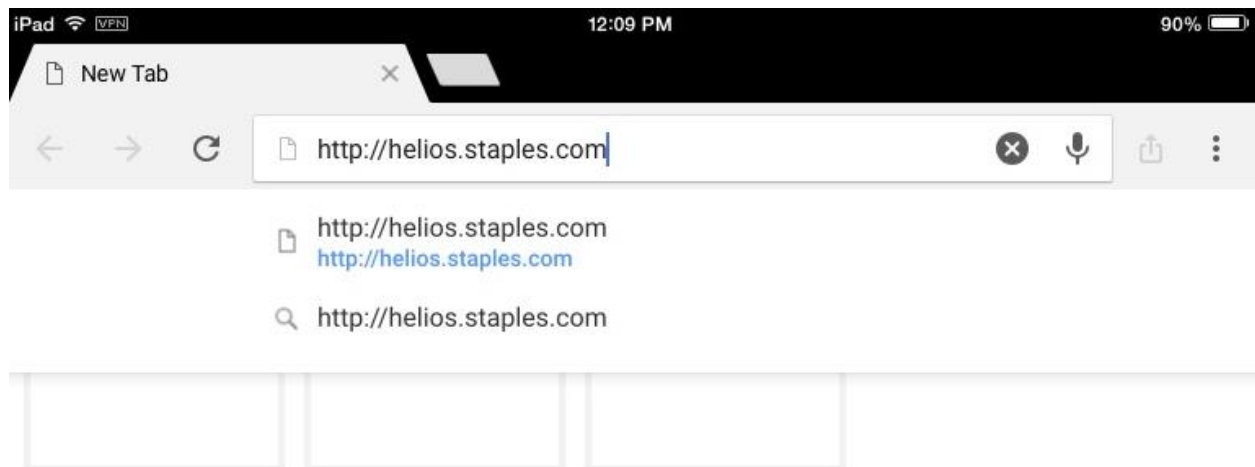

The screenshot shows a "Banner" dialog box. The title "Banner" is at the top. The text inside reads: "Security is important to Staples. Authorized access only for Staples Associates: You must comply with company policies, including the Electronic Communication System Policy. For non-Staples-Associates: Do not inappropriately access information, servers, or networks; cause disruptions of service; or attempt to circumvent information security controls." At the bottom, there are two buttons: "Reject" and "Accept". The "Accept" button is highlighted with a red rectangular border.

Step 14: Once accepted, you might see the “VPN” icon on the top left. This means that you are connected to Staples network.

Step 15: Open the Chrome browser app and type “helios.staples.com”

Step 16: The Helios log in page displays
